PROXIMITY CREDENTIALS

NubianRFID 125 KHz LF (low-frequency) proximity credentials provide an efficient, reliable, and cost-effective solution to existing or new physical access control systems. These generic credentials (credit card format, key fob, wristband, and round sticker) offer universal compatibility with today's most popular brands, making integration a simple process.

The credentials feature a convenient 125 KHz contactless technology and can be delivering already programmed with a variety of data formats and encoding commonly used in the physical access control industry. NubianRFID Proximity credentials are designed to be compatible with a large set of access control systems on the market, including:

Keri	AWID	RBH50	Kastle
Indala	Keyscan	HID Prox	Indentiv
Kantech	Casi-Rusco	FarPointe Pyramid	Honeywell Quadrakey

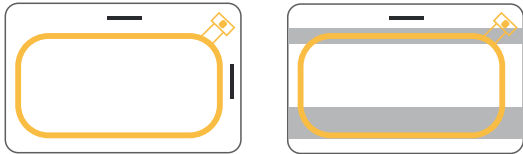

Wiegand Format 26, 32, 34, 36, 37, 40, 50 bit formats are fully supported by NubianRFID. Please contact your sales representative to verify if your format is currently handled. NubianRFID continuously expands its list of supported formats upon request.
